Thinking Right, June 2007
 Sorry, Harry, YOU'VE lost the war!

Harry Reid, Majority leader of the U S Senate recently stated the United States has already lost the war in Iraq, then he and his pal, Nancy Pelosi, Speaker of the House of Representatives passed a bill in both houses, cutting the funds for our Military, guaranteeing our loss. Can you understand what that means? Our men and women in the Armed Forces will be cut off from any additional funding for ammo, food, fuel, leaving them at the mercy of the enemies of America on the field of battle. If there is any definition of treason, this qualifies. Harry, Nancy, Teddy Kennedy and the rest of the jackasses, consider their party's return to power in the White House more important than the lives of the Military. They are so jealous of anyone who isn't one of their ilk being in any position of power; they will use every devious means at their disposal, legal or not, to harm them, damage their reputation, hinder their program or halt their progress. But you lost Harry, The President will get a bill without benchmarks!

Congress now has a twenty-nine percent approval rating, putting them at least as low if not lower than the President, depending upon which poll you believe, so Harry, you don't have America behind you! Over seventy percent of citizens disapprove of your methods. In your war to win the White House in 2008 your top tier candidates are starting to slip badly in the polls and cracks are showing with your far-left supporters who demand they move even further to the left. Dennis Kucinich is the only candidate thus far they like, and he is going nowhere. Your recently passed bills to defund the Iraq war went nowhere, and the country will not stand for your desire to cause a defeat by defunding the military just for your personal political gain. Just wait until the Ethics Committee begins to review your records. Tribal leaders in Iraq are turning against the insurgents, Al Quida has openly announced they will fight America there or here, and you're whipping a dead horse. The ?Lamestream Media? backs you, Perky Katie Couric is the anchor that is sinking CBS ship because of her leftist leanings, and the way you are trying to silence conservative talk shows is right out of the book ?1984? that few people remember, it ought to be required reading in schools next year.

New Conservative and right-of-center groups are springing up and the old, tired, leftist dreams of a socialist America are fading fast. Wake up Reid, Pelosi, Kennedy and the other liberal left in Congress, You've lost and are further behind than ever before. Winning the 2006 election sealed your doom, you haven't passed a single promised major bill yet because of your fixations, and face it Harry, you can't win in ?08.

I'm Vance and I'm Thinking Right

2. Last Meeting: Nancy Davis gave a short talk explaining her petition to " **bring Christmas back into Christmas.**". This petition is to encourage the Pinellas County School Board to develop a policy on how religious observance should be handled in Pinellas County Schools.. With those she collected at the meeting Nancy had over 570 people signed and supporting the petition. On Tuesday, May 8, 10:00 a.m. about 15 of us were at the School Board meeting most wearing red. Nancy presented the petitions, and Nancy, Sonia March, Rick Klenk, Jimmy Dean, and Ron spoke in support.

The School Board received us warmly. Linda Lerner and Nancy Bostock led a discussion with fellow School Board Members,

asking questions of Superintendent of Schools Dr. Wilcox and the Board Attorney. They decided to review all School Board's Policy on this subject Central Pinellas Republican Club meeting the following Thursday, May 10th Nancy received over 100 more signed petitions. As people become aware of the petition more want to be part. You may contact Nancy at njbdavis@msn.com or call at 727-392-5262 Well done Nancy.

Next Vance, as usual, spoke on happenings throughout the world and their importance to us.

American Minute with Bill Federer

Oscar winning actor Marion Michael Morrison, better known as John Wayne, was born MAY 26, 1907. A U.S.C. football player, he worked behind-the-scenes at Fox Studios, before being discovered by director John Ford, who cast him in epic western and war films.

On May 26, 1979, Jimmy Carter said: "I have today approved...a specially struck gold medal to John Wayne.

For nearly half a century, the Duke has symbolized the American ideals of integrity, courage, patriotism, and strength and has represented to the world many of the deepest values that this Nation respects."

Ronald Reagan said November 5, 1984: "I noted the news coverage about the death of my friend, John Wayne. One headline read 'The Last America Hero.'... No one would be angrier than Duke Wayne at the suggestion that he was America's last hero.

Just before he died, he said in his unforgettable way, 'Just give the American people a good cause, and there's nothing they can't lick.'"

In his album, *America-Why I Love Her, 1977*, John Wayne stated: "If we want to keep these freedoms, we may have to fight again. God forbid, but if we do let's always fight to win...

Face the flag, son...and thank God it's still there."

Gasoline: Regular \$3.199 per gallon Med. \$3.299 per gallon High test \$3.399 per gallon: Is the end in sight?

Gas prices on the rise, and what is the Government doing about it? The US Congress is addressing it. They are working on legislation to fine 'Big Oil' (called BO) millions of dollars if 'Big Government' ('called BG') feels they are 'price gouging'. Let's think on this. If 'BG' fines 'BO', who do you think will pay the fine? That's right, the cost is passed on to taxpayers. Guess who pays the 'BG' attorneys to handle these big lawsuits; we get to, through taxes?

God has provided us with a very wonderful answer. Our United States of America sits on Alaska Anwar Oil, major deposits of Oil in the Gulf of Mexico, as well as other domestic sources. God has provided us with enough oil for our own consumption and also with a such a surplus that we should be selling it to the world for profit.

Six months ago China announced that they were exploring for oil in the Gulf of Mexico, in a joint venture with Cuba. Last week the Mexican government announced that they have discovered oil in the Gulf of Mexico also. People have been frightened by Environmentalists that offshore oil drilling will destroy our beaches. Not so in Galveston, Texas, for example. Oil platforms and pumping sites in Louisiana are considered excellent fishing places. The big oil spills are associated with Old Tankers bursting open and spilling thousands of barrels of oil into the seas. Who pays for that wasted spilled oil? Why are afraid of disappointing Middle east Muslim's by not sending million of dollars each and every month, and saying, whatever you decide we'll pay, only please don't cut off our oil?

I asked my friend Rudi Schoppenthau where the Oil Fields were located in Germany in WWII, because they never ran out of oil for military, industry, and civilian use... He said that they had no oil wells, only coal mines, and these supplied gasoline, diesel fuel, oil products and oils. Coal is processed differently but the product is out the same. Am I the only one who remembers that Clinton, when he was our nations chief executive, made a big deal out of how he was protecting our western states from future Coal Mining, thus denying us of another tool to defeat high oil prices.

Another real problem is our Federal Bureaucracy, and government controls. Recently it was published that there has not been a new oil refinery built in this country in 30 years because it's too hard to satisfy 'BG' controls. . Can you imagine how it would be if you were Noah building your Ark today with government regulations and codes? It would be impossible.

The top 3 in Oil Producers in the world are located in the Middle East. Number 4 is the Dictator Chavez in Venezuela whose goal it is to see our nation destroyed. Number 5 is Exxon Oil. Only two American Companies are even in the top 10, so if you crack down and penalize BO) you really have 2 companies for BG to attack.

If only the USA utilized the assets available, then Ross Perot could say, "That big hissing sound you hear is air escaping from big balloon, the price of oil." Imagine gas at the pump going to \$1. a gallon plus all the various government County, State, and Federal taxes, no one knows how much that is, but it is probably as much as the gas.

And that's signs of the times by Ron.

5. _____ Some of the World's Worst: Based Right Here In Florida

Florida's economy is booming. It continues to be a national leader in job growth and it continues to have one of the lowest unemployment rates in the country. However, Florida is also home to a host of companies which are some of the world's worst. For example, RKNmedia, Inc. and Ox Ideas are based out of Miami and are two of the largest producers of internet pornography on the planet. (Note: I will not write the names of the sites they produce due to their graphic content.) They produce some of the most viewed pornographic sites on the net and have earned millions of dollars doing so. They are part of a growing internet exploitation problem in Florida.

Our great state also has sites which are borderline "pedophile" yet which are considered teen modeling sites. They are True Teen Babes in Tampa and Webe Web Corp. in Ft. Lauderdale. These sites cast barely legal and scantily dressed teens as models. All of these sites claim to be following the law and claim protection via the First Amendment.

But as we are told in Psalm 10:14-15(NKJV) "But you have seen, for you observe trouble and grief; to repay it by your hand. The helpless commits himself to you; you are the helper of the fatherless. Break the arm of the wicked and evil man; seek out his wickedness until you find none."

Those of us who see what these companies are doing are called by God to use all legal and peaceful means to stop them. The St. Petersburg Times notes in a November 23, 2006 article that Florida law prohibits the "use of computers to transmit images, information, data that is harmful to minors." Therefore, even if the images show two consenting adults engaging in consenting acts, the transmitting of those images should be prohibited. (Because a minor viewing two adults engaged in sex is clearly going to be harmed by those images). So any company that transmits those images is clearly violating Florida law.

My hope and prayer is that we can lobby our legislators and work with Florida's law enforcement to strike a major blow to those who harm our children through the internet images they produce. God Bless America, John Giotis
